

# Wellington Fields Allotments

## ALLOTMENT RISK ASSESSMENT

### **Introduction**

Under civil law anyone involved in allotment management has a common duty of care to ensure that their allotment sites are run in as safe and appropriate manner as possible. This duty of care is extended towards all people accessing the allotment site and its boundaries, including allotment holders and tenants, parish council representatives carrying out duties, members of the public, *bona fide* visitors and volunteers. There are also environmental laws to be observed. In order to make sure that the Health and Safety policy is being adhered to, risk assessments will be carried out on the site. The details about these risk assessments are found in this document.

### **Responsibilities**

Allotment tenants have a duty of care and are responsible for their own health and safety and for the safety of others whilst on the allotment garden. Allotment tenants have a duty of care to anyone on their allotment, regardless of whether they have given permission for them to be there.

Wellington Fields Allotment Association will inform allotment tenants of issues that are directly relevant to them. It is beyond the scope of this policy to give advice about individual gardening activities.

Risk assessments shall be used as a framework for the identification of risks, assessing their relative severity and development of a strategy for dealing with them.

## **Risk Assessments**

The objective of the risk assessment is to remove the risk completely or to reduce the risk to an acceptable level. Reduction levels are defined by the grading system in the risk assessment. Risk assessments shall be carried out at least once per year, and will look at risks such as ground hazards, e.g. broken glass on derelict plots, may be hidden by summer weed and grass growth.

Risk assessments apply to the general site which includes plots, thus ensuring that allotment holders are complying with the policy, which is part of their tenancy agreement.

Where possible, Allotment tenants shall be informed in advance of the date of the risk assessment and level of access required on each plot. Every effort will be made to undertake the assessment on a day that is not busy, to minimise intrusion on plot holders' privacy.

## **Risk Assessment Execution**

Risk assessment shall be carried out by a member of the Allotment Association. The assessment shall include the full site, and be undertaken in a methodical manner. For example, walking around the external boundary, entering through the front gate and working way around the internal boundary, the communal areas and each allotment garden.

From the assessment, the degree of risk shall be calculated and the recommended remedial action required to remove or minimise the risk at the time of identification. Notes shall be taken in such a way that they can be reported back to the parish council.

While undertaking the assessment the privacy of allotment tenants will be respected at all times, ensuring, for example, that the assessors remain on paths and limit walking on allotment gardens.

## **Risk Assessment Completion**

Once the risk assessment has been completed it shall be taken to the rest of the committee, who shall then decide how to deal with the identified risks. Records of risk assessments undertaken (along with remedial action notices) will be kept by the Secretary of the Association.

## **Remedial Action**

Wellington Fields Allotment Association shall determine who is responsible for carrying out remedial action for each identified risk. Responsibility may lie with Hixon Parish Council the Land owner or Allotment Tenant, depending on the nature of the issue.

If remedial action is the responsibility of any person or organisation other than Wellington Fields Allotment Association itself, written notification shall be sent immediately. A collective 'notice to remedy' shall be posted at the allotment site detailing all hazards found on plots, correction required and deadline for completion. Allotment tenants shall be reminded of their duty of care in the notice.

If hazards have not been rectified by the due date for rectification, an individual 'notice to remedy' shall be given to the Allotment Tenant concerned. If subsequent notices are ignored ultimately a 'notice to quit' shall be served in accordance with the tenancy agreement.

### **In Case of fire or Serious incidents**

In the case of fire, allotment tenants and visitors should leave the allotment site immediately, and gather at the main gate. Tenants should ensure that all people working on their allotment garden are accounted for. Allotment tenants are encouraged to look out for other gardeners or visitors on adjoining allotment gardens to ensure their safety.

In the case of fire or serious accident the allotment tenant must inform the Allotment Committee.

### **Policy Implementation**

Wellington Fields Allotment Association will oversee Health and Safety issues.

### **Enforcement**

Enforcement of the policy will be by Risk Assessments and remedial action notices, and in extreme circumstances a 'Notice to Quit' may be issued. Prior to this the plot holder will be advised of remedial action that be taken and warnings given.

## RISK ASSESSMENT REPORT

<b>Wellington Fields Allotments</b>			<b>Date of Assessment</b> 17/02/2020	
<b>RISK ASSESSMENT</b>				
Allotment Holder/Tenants/All			Visitors Working party/Committee /Plot holders	
<b>Common Hazards</b>	<b>Standard Control Measures</b>	<b>Further Action / Comments</b>	<b>Action Level</b> <i>(High / Medium / Low)</i>	<b>Action Date</b>

		ends with can caps.		season Medium
<b>Use of vehicles on site (Gaining Access and Leaving)</b>	Accidents caused by moving vehicles	<ol style="list-style-type: none"> <li>1. Care taken at the entry and egress from the site as visibility is poor.</li> <li>2. Care should be taken when moving within the site.</li> <li>3. Use the provided parking area.</li> <li>4. Only use the track to drop off /pick up equipment thereby reducing traffic movements within the site.</li> </ol>	This will be monitored by the committee and if necessary inform individuals or plot holders in general if issues occur.	High Priority Throughout the season.
<b>Pandemic Covid 19</b>	Spread to plot holders	All plot holders must follow the guidance placed around the site and communicated via email and social media.	The committee will ensure that plot holders must follow the guidelines.	High /Website/Face book/ Newsletter/ Social media/on the plot

**COMMENTS / ADDITIONAL INFORMATION**

- It is recommended that, particularly at quiet times, plot-holders inform someone where they are, and their likely return time.
- Each allotment holder responsible for their actions and use of allotment gardens
- Each allotment holder is responsible for their health and safety and the health and safety of others
- All children must be supervised at all times by parents and / or carers
- Continued misuse of allotment gardens or careless actions towards others may result in eviction from the site if deemed necessary by the committee.
- **Please take care when arriving in a vehicle take care of other plot holders. Be aware of pedestrians, farm vehicles and cars when leaving or arriving at the site. Please do not leave your engines running for a period of time.**
- Only park near your plot when unloading ... Vehicles should be parked in the main car park and moved away from plots.
- Attached are the Pandemic Emergency measures.
- We will have a themed approach to health and safety issues.

**N.B:** The main focus of undertaking risk assessments is to identify areas where there is a significant risk, with the requirement to identify and implement controls which will reduce the level of risk to the lowest acceptable level.

As Assessors we have considered the current and additional controls and consider this activity to have been reduced to a level that is acceptable or as low as is reasonably practicable.
